CASE STUDY 1: Personal Portfolio Website (portfolio/)

1. Problem Statement / Overview

Build an authentic, personal portfolio website showcasing student developer identity, educational credentials, programming skills, academic projects, and contact channels.

2. Objectives

• Structure content cleanly using semantic HTML tags (<header>, <section>, <footer>).

• Apply clean CSS styling with a centered card layout and high-contrast typography.

• Highlight key programming skills (Python, C, HTML5, CSS3) and academic coursework.

• Ensure clean presentation and readability across desktop and mobile screens.

3. HTML Source Code (portfolio/index.html)

```

7. Conclusion

The personal portfolio website successfully represents student developer credentials with semantic HTML structure and clean, readable CSS styling.

CASE STUDY 2: College TechFest & Hackathon Portal (techfest/)

1. Problem Statement / Overview

Design an interactive annual college symposium website ('NRIIT TechFest 2026') featuring competition cards, prize money badges, symposium schedule table, and an online participant registration form.

2. Objectives

• Design a vibrant gradient hero banner with event dates and venue details.

• Construct a responsive CSS Grid showcasing 4 technical competition categories (Coding, Web Dev, AI, Quiz).

• Build a structured schedule table outlining event timing, venues, and coordinators.

• Implement an accessible registration form with input text fields, dropdown selection, and a submit button.

CASE STUDY 3: Campus Cafe & Snack Menu Page (cafe/)

1. Problem Statement / Overview

Develop a warm, inviting food menu and order portal for the college campus cafe ('Brew & Bite Cafe'), featuring quick operational highlights, chef's daily specials, an itemized beverage and snack price table, and pre-order contact information.

2. Objectives

• Implement a warm coffeehouse aesthetic using rich brown and amber color palettes.

• Build an operational highlights ribbon displaying cafe timings, student center location, and WiFi details.

• Design a card grid highlighting daily specials (grilled paneer sandwich, cold coffee, mini pizza) with price badges.

• Construct a categorized menu table detailing beverage and snack pricing.
